SUMMARY

Full Stack Developer with 3+ years of experience building scalable web apps using Angular, Laravel, Node.js and Docker. Proven ability to automate workflows and deliver user-focused, end-to-end solutions.

EXPERIENCE

Programmer

MPPEF - Ministerio del Poder Popular de Economía y Finanzas   **January 2025 - Present**

· Designed, developed, and implemented robust and scalable systems using Laravel and Vue.js, optimized with Docker containers, including a key inventory system that resulted in a 60% increase in the ministry's operational productivity.
· Improved code maintainability and stability of developed systems, reducing average bug resolution time by 30% and ensuring high availability for critical operations.
· Automated deployment and infrastructure management processes using Docker, decreasing time-to-market for new features by 45% and optimizing server resource utilization.
· Collaborated closely with cross-functional teams to analyze requirements, define software architectures, and deliver solutions that consistently met the ministry's strategic objectives.

Risk Assurance Services Assistant

PwC   **August 2023 - October 2024, Venezuela**

· Developed internal modules for risk analysis using Angular and SQL Server Management Studio, improving audit process efficiency by 25% and accuracy in identifying findings.
· Executed comprehensive system and SQL database audits for 5+ clients, identifying vulnerabilities and recommending solutions that strengthened security posture and regulatory compliance.
· Strategically contributed to 5 cybersecurity projects, participating in the design and implementation of security controls and technology risk assessments, which helped mitigate 20+ potential threats.
· Created advanced Power BI dashboards for visualizing risk metrics and audit results, optimizing data presentation and facilitating strategic decision-making for management and clients, enhancing report clarity by 30%.

PROJECT

Personal Portafolio

Venezuela · portafolio-brandon-bello.web.app

· **Showcases 3+ comprehensive full-stack projects,** meticulously detailing the application of modern technologies such as Angular, Laravel, Vue.js, Flutter, and Firebase to solve real-world challenges and deliver tangible results.
· **Provides interactive project exploration through embedded video demonstrations and direct links to live demos,** allowing for an in-depth assessment of functionality, user experience design, and technical execution, with some projects including readily available credentials for immediate access.
· **Features a clearly defined skills matrix,** categorizing expertise across front-end (HTML5, CSS3, JavaScript, Angular, Vue.js), back-end (Node.js, PHP, Laravel, PostgreSQL), and Mobile & Cloud technologies (Flutter, Firebase, AWS, Docker, Git), highlighting a versatile and robust technical foundation.
· **Designed as a dynamic and user-friendly experience,** leveraging animations (AOS), responsive design, and clear navigation to effectively communicate over three years of professional experience in developing innovative, scalable, and high-quality digital solutions.
· **Offers multiple direct contact channels and a downloadable CV,** facilitating seamless communication for potential collaborations, freelance opportunities, or full-time employment discussions.

EDUCATION

Associate Degree in Computer Science

Instituto Universitario Jesús Obrero (I.U.J.O) · Venezuela, Caracas · 2023

· Mastered core computer science principles through comprehensive coursework in key programming languages (JavaScript, Typescript, Python), advanced data structures, and relational database management systems (MySQL).
· Developed a robust foundation in both theoretical frameworks and practical application of computer science.
· Sharpened critical problem-solving and analytical abilities through several hands-on projects and collaborative assignments, demonstrating exceptional aptitude in algorithm design and full-cycle software development methodologies.

SKILLS

Technical Skills:
Front-end: HTML5, CSS3, Tailwind CSS, JavaScript, TypeScript, Angular, Vue.js, and Flutter;
Back-end: Node.js, Laravel, PHP, Firebase, AWS, Docker, and Git;
Database: PostgreSQL, MySQL, and SQL Server.
